

Data Governance

Practical Resources to Support Implementation of Best Practices at Community Health Centers

Background

Many CHCs participating in PHMI have indicated that they need assistance in establishing or improving their organization's current data governance approach. The resources PHMI used to provide the technical assistance are publicly available and free to use from the [Center for Care Innovation \(CCI\)](#).

About the Resources

All three recommended data governance resources share the same content in structure and language. The primary difference between the resources is the depth of content and how the material can be consumed by the learner. See below for the brief description and link for each resource.

[The Handbook](#)

Provides practical, step by step guidance with tools and worksheets for implementing effective data governance.

[The Video Learning Series](#)

Can be used alone or as a companion to the Handbook. The components of the five chapters of this series with videos and tools are also linked to in the Handbook.

[The Short Course](#)

Brings together select content (videos and tools) from the Handbook and Video Learning series. A free CCI Academy account is needed to access this short course.
